Summary

I am currently pursuing a technical degree in systems analysis, specializing in software development, database administration and cybersecurity. Throughout my academic career, I have participated in hands-on projects and internships that have provided me with practical experience in these fields. My passion is the application of artificial intelligence to optimize business processes, which I have explored through courses and personal projects.

Beyond academics, I maintain an active lifestyle, participating in various sports to stay physically fit and foster discipline. This balance enhances my ability to meet challenges effectively.

With experience in React.js for frontend development, Node.js for backend development, and proficiency in RESTful API design, I am well versed in modern software technologies. I have also honed my skills in version control systems such as Git, adopted agile methodologies to improve project efficiency, and developed strong problem solving and team collaboration skills.

I am eager to leverage my skills and enthusiasm for technology to contribute to cutting-edge solutions that deliver tangible results.

Experience

IESA — **March 2023-Present**
Full Stack Web Developer — Posadas, Misiones.

Freelance — **January 2023-Present**
Full Stack Web Developer

- Collaboration with clients to understand and solve problems in their projects.
- Maintenance and improvement of existing code in GitHub repositories.
- Implementation of effective and efficient solutions to fix bugs and improve functionality.

Education

Instituto Superior de Estudios Argentino — **March 2024-Present**
Técnico superior en análisis de sistemas — Techn
