Summary

I am currently a student of the Systems Analysis degree at Tec, where I have honed my skills in software development, database administration and cybersecurity. At 24 years old, my academic career has been enriched with practical projects and internships that have allowed me to apply my knowledge to practical challenges. I am particularly passionate about leveraging artificial intelligence to optimize business processes, an interest I have deepened through courses and personal projects.

Outside of my academic pursuits, I maintain an active lifestyle by participating in various sports, which not only keeps me physically fit, but also fosters discipline and balance in my life.

With a keen eye for detail and a dedication to continuous learning, I am excited about the opportunity to contribute to cutting-edge technology solutions that make a tangible difference.
